23. Problem: (use additional Sheets if necessary) Need to be able to write to the directory "/devdata1/HEGDATA". Presently, the HEG team can not do so, unless they are on xserv01. The Synergy III HEG program needs to run on corvette, cobra, stallion, jenga, f2acg01, and xserv01. HEG has to write to this particular directory because it's output is very large, and there is not adequate disk space in the usual areas, such as "/home/cpradera", and "/net/htsc/htsc". As Andre Kiebusinski knows, "/devdata1/HEGDATA" was assigned to the HEG team recently because of disk space problems, but it has not solved it completely since I can not write to it						
24. Proposed Solution: (use additional sheets if necessary) Make the directory /devdata1/HEGDATA visible to other ECS machines, in particular: corvette, cobra, stallion, jenga, f2acg01, solara. (presently, it's only visible from xserv01, and hege1 which is a Linux box). Make the above directory writeable from hege1, since presently it is only readable.						
25. Alternate Solution: (use additional sheets if necessary)						
26. Consequences if Change(s) are not approved: (use additional sheets if necessary)
